4. Special Considerations - Please Read Carefully.

- A.** If money is being transferred from a Government Cash Management Fund account to a fund account that is not registered to the same customer, the free exchange privilege does not apply. Thus, for example, if a payment is being made from a joint account to an individual fund account of one of the joint owners, the applicable sales charge must be imposed.
- B.** The customer must sign this form even if the Government Cash Management Fund account and the investment being made are registered to the same owner. If the owners are not identical, each Government Cash Management Fund account owner must have their signature(s) guaranteed. Please refer to the "Signature Guarantee Standards and Procedures" form for more information.
- C.** For payments from a Government Cash Management Fund account that is in a retirement account, the appropriate distribution request form must be attached unless the transaction requested is a trustee-to-trustee transfer.
